

## **11<sup>th</sup> Asia Pacific Roundtable on Sustainable Consumption and Production (11thAPRSCP 2014):**

### **“Paving the Way to the Future We Want in Asia and the Pacific”**

19-20 May 2014, at Plaza Athenee Bangkok, Thailand

---

## **INFORMATION NOTE FOR SPEAKERS**

### **I. The Asia Pacific Roundtable for Sustainable Consumption and Production (APRSCP)**

The APRSCP is an Asia-focused international, nongovernmental, non-profit, network institution that promotes sustainable consumption and production in the Asia-Pacific. It was established between 1997 and 1999 from a regional cleaner production meeting in Thailand with the support from United Nations Environment Programme (UNEP) and the United Nations Industrial Development Organization (UNIDO) and other partners. The APRSCP Network was formed to foster dialog and partnerships between industry, governments, academia and non-governmental organizations in the region.

The roundtable has been held every 18 to 24 months since being founded, working to facilitate uptake of SCP research, policy and practice. To date, the APRSCP has held 10 roundtables within the region and has built up a strong network covering the entire Asia Pacific region. These roundtables were hosted by member countries in Asia Pacific co-organized by the Board of Trustees of the APRSCP and supporting partners such as UNEP and UNIDO. The APRSCP network has grown and matured over the years and, with its supporters, has cooperated in recent projects such as Resource Efficient and Cleaner Production activities in the Asia-Pacific region.

### **APRSCP and the 10-Year Framework of Programmes (10YFP) on SCP**

The APRSCP has been a dialogue platform in sharing and promoting best practices, programs, local initiatives, policies and lessons learned on SCP related projects in Asia and the Pacific region. APRSCP outputs have been used as major inputs in global decision-making processes, such as the World Summit on Sustainable Development and the 18th and 19th session of the Commission on Sustainable Development.

The participants of the 10th APRSCP in Yogyakarta, Indonesia last November 9 to 11, 2011 signed the declaration on the implementation of Sustainable Consumption and Production (SCP) in Asia and the Pacific Region, which was then submitted in the United Nations Conference on Sustainable Development 2012 (Rio+20). This declaration was also instrumental in the adoption of the “10-Year Framework of Programmes (10YFP) on SCP Patterns” as one of the outcomes of the Rio+20.

The 10YFP is a global framework of action to enhance international cooperation to accelerate the shift towards SCP to achieve sustainable development by decoupling environmental and social impact from economic growth. The 10YFP will develop, replicate and scale up SCP and resource efficiency initiatives, at national and regional levels, by providing support for capacity building and technical and financial assistance to developing countries for this shift. All stakeholders from Asian countries can be involved in the activities of the 10YFP: governments, business and industry (i.e. the private sector), researchers in the scientific and technological community, academia, major groups including NGOs, financial institutions, and other stakeholders. The Roadmap for the 10YFP Implementation in Asia and Pacific has been recently developed as one of the outputs of the First Asia-Pacific Regional Meeting on the 10YFP in November 2013.

## **II. The 11<sup>th</sup> APRSCP: “Paving the Way for the Future We Want”**

In light of this current global framework, the 11th APRSCP hopes to continue engaging multi-stakeholders in developing and implementing innovative policy solutions, up-scaling technology and knowledge benchmarking, approaches and instruments towards the development and implementation of programmes on SCP. It aims to contribute to the implementation of the 10YFP on SCP adopted at the United Nations Conference on Sustainable Development in Brazil (Rio+20). The 10YFP implementation is extremely valuable for Asia Pacific as a platform for stakeholders to respond to the global challenge of decoupling environmental degradation from economic growth. Other forums and platforms for convergence such as the ASEAN and formulation of the Sustainable Development Goals are also explored, looking at how stakeholders can work together with policy-makers on putting SCP in the forefront as a priority agenda in the regional and national level.

## **III. Objectives**

The 11<sup>th</sup> APRSCP will provide a platform for multi-stakeholders from Asia and the Pacific to come together to:

1. Promote best practices, programs, local initiatives and lessons learned on SCP related projects in Asia and the Pacific region.
2. Identify synergies and build cooperation to engage actively in the development and implementation of the 10YFP.
3. Enhance discussions on *Paving the Way for the Future We Want in the Region* by sharing experiences and lessons learned in scaling up existing and new SCP technologies, strategies, tools and approaches through research and information awareness, capacity building, financing, and monitoring and evaluation.

## **IV. Output**

1. Compendium of best practices, programs, local initiatives and lessons learned on SCP related projects in Asia and the Pacific region.
2. A set of recommendations on how stakeholders can scale up implementation of SCP technologies, tools and approaches through specific current or new projects, programs, and strategies to be implemented in the next three (3) years.

3. Recommended regional program/activities for research, communication, capacity building, financing and monitoring and evaluation to scale up SCP best practices and initiatives.

## **V. Rationale of the Agenda:**

The 11th APRSCP is designed as a series of plenary and parallel roundtables to engage policy-makers, academic and scientific experts, business and civil society groups including the youth, towards finding a common ground on how to upscale the development, implementation, monitoring and evaluation of SCP in the Region. The selection of priority thematic issues discussed are based from previous decisions of APRSCP Board and partner organizations involved in the 11th APRSCP.

These issues are also highlighted in previous events organized by partners as current priorities on SCP in the Region, from planning and implementation of SCP and how SCP is mainstreamed in priority sectors, and discussion of the role of governments, business and other stakeholders on implementing SCP and how these can be monitored and evaluated. Continuous learning and capacity building are also highlighted as key priority particularly on the use of tools for resource efficiency and clean production.

## **VI. Information on the Sessions**

### **a. Plenary Sessions**

The 11th APRSCP Roundtable will have two plenary sessions. The first plenary session will focus on Public-Private Regional Policies, Initiatives and Cooperation toward SCP and Green Growth where speakers and participants can share regional, national and local best practices, programs, initiatives and lessons learned on SCP related projects in Asia and the Pacific region. The second plenary session will discuss SCP Regional Program/Activities particularly the main outcomes and follow up of Rio+20 related to SCP such as identifying synergies and building cooperation to engage actively in the development and implementation of the 10YFP in the region.

### **b. Roundtable sessions**

There are five Roundtable Sessions focusing on selected priority areas on SCP:

1. Roundtable 1: SCP in planning and implementation
2. Roundtable 2: Mainstreaming SCP in priority sectors
3. Roundtable 3: Sustainable Consumption
4. Roundtable 4: SCP progress – for business and policy makers
5. Roundtable 5: Resource, Efficient Cleaner, and Safer Production

Each Roundtable will have four sessions where speakers (resource experts and country representatives) will present on the selected topics followed by interactive discussions and insights from participants, including presentations of submitted technical scientific papers with latest research findings and best practices on technology, management, and policy on SCP.

The session will help discuss and consolidate:

1. Progress achieved and key ongoing initiatives, programs on SCP including related initiatives focusing on green economy/growth in the Asia and the Pacific region.
2. Challenges on scaling up the use of SCP strategies, tools and approaches and identify gaps in terms of technical and/or financial support, capacity building, research or policy support on SCP methodologies and tools.
3. Identification of new challenges and opportunities to scale up SCP policies and implementation and exploring areas for further cooperation under regional initiatives, such as the 10YFP, the ASEAN forum on SCP, and the Sustainable Development Goals.
4. Recommendation of regional programmes/activities for research, communication, capacity building, financing and monitoring and evaluation to scale up the best practices and initiatives in SCP priority areas.

Afterwards, all sessions will convene and report in the closing plenary session.

### **C. Closing Plenary**

There will be a closing plenary session at the end of the DAY 2 after all the parallel sessions. The highlights of all plenary and parallel roundtable sessions will be summarized and reported. Afterwards, a panel discussion on the way forward will be discussed among the key partners organizing 11th APRSCP. After the closing remarks, the APRSCP banner will be handed over to the next host country for the 12th APRSCP, which will be in Cambodia on 2016.

## **VII. Organizers, Partners and Sponsors of the 11<sup>th</sup> APRSCP**

The 11<sup>th</sup> APRSCP is co-organised by APRSCP, the United Nations Environment Programme (UNEP) serving as the Secretariat of the 10YFP on SCP, with the Government of Thailand's Pollution Control Department of the Ministry of Natural Resources and Environment and the Faculty of Environment of Kasetsart University. This event is made possible with the financial and technical support of the EU funded and UNEP managed SWITCH Asia Regional Policy Support Component programme.

Other partners for the Roundtable sessions are as follows: United Nations Industrial Development Organization (UNIDO), Ministry of Industry, Thailand; EU Switch Network Facility, and the Deutsche Gesellschaft fuer Internationale Zusammenarbeit (GIZ) GmbH. The 11<sup>th</sup> APRSCP is also supported by platinum sponsors (the Siam Cement Public Company Limited, Thailand and the Electricity Generating Public Company Limited, Thailand) and gold sponsors (The Bangkok Petroleum Public Company Limited Thailand, the PTT Public Company Limited).
