

Frank Mueller

Mr. Mueller, a resident of Thailand, is a German industrial engineer who specialises in plant management and operation. He is currently the managing director of Modi Consult Co. Ltd., a Bangkok based consulting firm and an international service and solution provider for Sustainable Development. His services include the development of web based solutions and service infrastructures to enable the uptake of sustainable business management practices in Asian industries. He started his Asian career as a project manager at the Fraunhofer Institute for Factory Operation and Automation (IFF), Germany. Since 2000 he has been responsible for various complex Asian technology transfer and implementation projects that covered a wide range of management and capacity building topics in industries, such as ICT based performance controlling. He is actively involved in different southeast Asian initiatives and organisations such as the Asian Society for Environmental Protection and the Asia Pacific Roundtable for Sustainable Consumption and Production (APRSCP).
